- Computer maintenance and repair (Mac and PC).
- Responsible for research and development.

PROFESSIONAL SUMMARY

I am a seasoned Full-Stack Engineer with over 20 years of experience designing, building, and leading high-impact web platforms. My expertise includes React, TypeScript, Node.js, API design, distributed systems, and creating intuitive, user-centered experiences supported by strong backend architecture. With a background in photography, visual design, and advertising, I bring a unique perspective that blends technical excellence with elegant, effortless product design. Throughout my career, I have led initiatives in system architecture, engineering standards, developer mentorship, cross-functional collaboration, and production operations, while delivering scalable microservices and mission-critical solutions for global teams.

I have extensive cloud experience across Amazon Web Services and Google Cloud, managing serverless systems, infrastructure automation, performance, reliability, and cost efficiency. My background also includes analytics and experimentation using Mixpanel, Google Analytics, and LaunchDarkly to guide data-driven product decisions and progressive feature releases. In recent years, I have deeply integrated AI into my workflow by building LLM-powered solutions, automating engineering processes, and promoting responsible AI adoption across teams. I excel in roles where I can combine hands-on development, mentorship, systems thinking, and architectural leadership to create scalable, maintainable, and business-focused platforms.

SKILLS & COMPETENCIES

JavaScript	~17 years professional use since 2009
PHP	~15+ years since freelance web development, shifted to JS/Node area
Python	~14+ years mainly scripting and backend tasks
C++	~5+ years since early freelance programming but did not push through it
MySQL	~17 years in production systems
MSSQL	~5+ years working with enterprise databases but did not push through it
PostgreSQL	~10 years in modern backend stacks
MongoDB	~9+ years since Node.js backend work
React	~7–8 years building production frontend apps
Angular	~10 years including migration from legacy JS
jQuery	~17 years in legacy and enterprise UI systems
Next.js	~5–6 years in modern React frameworks
Vite	~3–4 years in modern build tooling
Node.js	~9–10 years backend engineering with Node
Laravel	~7–8 years in PHP frameworks
Zend	~8 years enterprise PHP framework experience
API Development	~15+ years designing and maintaining APIs
AWS	~5–6 years with AWS serverless and cloud architecture
Docker	~5–6 years containerization in production
Vagrant	~5–6 years in development environments
Nginx	~17 years managing production web servers
Apache	~17 years web hosting and server management
IIS	~17 years including ASP/IIS environments
Git	~10–12 years distributed version control
SVN	~17 years since early enterprise development
Google Analytics	~10 years analytics and product tracking
LaunchDarkly	~3–4 years feature flagging and experimentation
ChatGPT / LLMs	~2–3 years integrating AI into development workflows
Cursor AI	~1–2 years AI-assisted coding
Claude / Codex / Gemini	~2 years AI tooling in production workflows
Ionic/Cordova	~7–8 years hybrid mobile development
Unix/Linux	~17 years working in Unix-based environments
Windows Server	~17 years enterprise and LAN environments
JIRA	~5–6 years agile and enterprise project tracking
ClickUp Automation	~2–3 years workflow automation

ACHIEVEMENTS AND CERTIFICATES

PLC Appreciation Meralco Foundation Institute	October 5, 2000
Local Area Networking University of Pangasinan	September 30, 2000
Graduate with special award, Best Project of the Year University of Pangasinan	March 2000
Local Area Network and Windows Networking University of Pangasinan	March 18, 2001
Graduate with special award, Programmer of the Year University of Pangasinan	March 2001
Bachelor of Computer Engineering in University of Pangasinan University of Pangasinan	March 2001
